問 下記の文章を読み、農業経営が生産的・持続的となるために必要な事項を整理・記述しなさい。After reading the following, describe what should be done to achieve more productive and more sustainable farm businesses.

“More than 500 million family farms manage the majority of the world’s agricultural land and produce most of the world’s food. We need family farms to ensure global food security, to care for and protect the natural environment and to end poverty, undernourishment and malnutrition. But these goals can be thoroughly achieved if public policies support family farms to become more productive and sustainable; in other words policies must support family farms to innovate within a system that recognizes their diversity and the complexity of the challenges faced.”
